INTERESTS

Drawing

I am constantly drawing in my free time. I love to learn new styles and better my current skills. I draw almost everything I can because practice makes perfect. I draw both traditionally with pencil and paper and digitally using my drawing pad.

Playing Games

I love playing different games whenever I have the free time to. I love the exposure to different art styles in both 3D and 2D games and the newly emerging VR community. I also love the challenge of learning a new game and different mechanics.
