PROFILE

- A computer science and technology undergraduate possesses research and development experience in full-stack projects and desires to seek jobs related to full-stack engineers and pursue long-term development in this field.
- A versatile candidate with theoretical knowledge and practical experience in computer science and technology keeps abreast of the industry's development trends, masters the back-end development technologies of servers such as React.js, Vue.js and Nest.js, and can design and develop server-side logic and database interaction; a capable person is familiar with Spring Boot and other development frameworks as well as front-end development technologies, is equipped with system architecture design, database design & management skills and different technology stack and domain knowledge, and can participate in the whole development cycle of projects.
- A self-motivated individual has once served as the project leader and the engineer of the Todolist Multi-terminal (H5+Electron) Full-stack Project and the Intelligent Password Lock Project and has developed great logical thinking and outstanding project management, overall planning, problem-solving, and interpersonal communication skills through experience.

EDUCATION

The Open University of China	Mar 2024 - Sep 2027
Bachelor of Public Affairs Administration	Shanghai
Communication University of China 211 Double 1st-Class	Sep 2021 - Jan 2024
College Diploma of Public Affairs Administration, College of Continuing Education	Shanghai
Shanghai Polytechnic University	Sep 2017 - Jun 2021
Bachelor of Computer Science and Technology (Study Uncompleted), Department of Engineering	Shanghai

PROFESSIONAL EXPERIENCE

Shanghai Youtong Network Technology Co., Ltd.	Jun 2023 - Mar 2024
Founder	Shanghai
<ul style="list-style-type: none">Formulated the company's vision and business development strategies and built an efficient team to ensure the team's cooperation; introduced one technology and one operation partner; communicated with the partner from time to time at WeChat and Dingtalk to adjust the business proposal and project details and deliver a complete business proposalTook charge of the company's financing and capital operations and sought suitable investment and financing opportunities to promote the company's development; actively promoted projects through yunduijie.com, itjuzi.com, and other platforms to attract investors; proactively submitted the business proposal to investors through e-mail, platforms or offline summits to attract financing opportunitiesPresided over the company's marketing activities to improve the company's exposure and popularity; maintained good relations with potential customers or investors	
Ctrip Travel Information Technology (Shanghai) Co., Ltd.	Feb 2023 - Mar 2023
English Customer Advisor, IBU Customer Support Center	Shanghai
<ul style="list-style-type: none">Established good communication and trust relationships with customers through telephone, chat, e-mail, and other online channels; answered customers' questions about products, services, prices, delivery, and other aspects when they used Ctrip.com in English; regularly followed up customer needs to improve customer satisfaction and stickinessPromoted Ctrip culture to internal and external personnel through online and offline channels; prepared and publicized corresponding copywriting to establish a good brand imageLearned and understood the passenger rules of air tickets and the use of ticket counter software; assisted in completing special projects assigned by team leaders/supervisors to support the smooth operation of the department	

PROJECT EXPERIENCE

A Todolist Multi-Terminal (H5+Electron) Full-Stack Project	Feb 2024 - Feb 2024
Project Leader & Full-stack Development Engineer	Shanghai
<ul style="list-style-type: none">Description: The project established the Todo List system and trained libraries and hook functions related to React and Vue ecology to improve the understanding of aspect-oriented programming concepts, etc.Duties: Learned and mastered the front-end page of React Todolist through courses and official documents; integrated the back-end with TypeORM based on Nest.js and connected MySQL to make data persistent; used Vue, Spring Boot, MyBatis and other technical frameworks to integrate React with Electron.js according to practical resultsAchievements: Made the page run as an application of Windows and macOS, mastered the RESTful API and successfully connected communication between the front end and the back endProject Address: https://github.com/aaronlee916/todolist-react-nest	
An Intelligent Password Lock Based on Hongjing Technology 51 MCU	Mar 2018 - Jun 2018
<ul style="list-style-type: none">Description: project realized the function that the owner can customize the password or unlock it by interacting with the LCD screen through communication between the Proteus simulation single -chip microcomputer and on-chip peripheralsDuties: information and analyzed needs to determine the project subject of intelligent password lock; designed and implemented the project plan; purchased the 51 development board and supporting videos, self-learned the use of timer, serial port, and buses on the chip and the register configuration to adjust the LCD display screen, matrix keyboard, EEPROM, buzzer, and the relay for the controlling lock head in turn to solve the project bugAchievements: Solved the problem that EEPROM could not input data, and finally delivered a C source code and a PCB Layout for production	

SKILLS

- Expertise:** Skilled in MS Office Suite, familiar with React.js, Vue.js, Nest.js, Spring Boot, and other tools (NCRE II Certificate)
- Languages:** Native in Chinese Mandarin and fluent in English with outstanding communication skills (IELTS: 7.0 points, CET-6: 577 points)
- Interests:** Latin Dance (Judge Qualification Certificate), Music Production (NetEase Musician), holding an active and healthy lifestyle
