

Michael Fowler Resume'

I have been involved in IT and training for over thirty years and have a solid IT technical foundation as well as the necessary people skills to impart my knowledge. My autistic son has taught me the patience needed as well as the skills required to teach anyone. I love to make a difference in peoples lives and have enormous respect for anyone who chooses to develop their skills at any age. Learning should be a lifelong pursuit and I consider it an honour to be part of that journey.
