- Taught Mathematics and English to a young learner in preparation for examinations.
- Provided a fun and engaging environment to keep him on track to achieving his goals.
- Used various platforms of learning, including online.

Interests

Travelling

Over the last few years, I have been lucky enough to experience and immerse myself into multiple different cultures throughout Asia and Europe. I have a passion to explore the off beaten track and enjoy engaging in the lifestyle and traditions of other countries. When travelling through Asia, especially the Philippines, I felt a real sense of community in every village I visited, and the children were so passionate about learning and what they can do to enhance their future; this truly inspired me to fulfil my TEFL journey. Therefore, I now hope to pursue my dreams of further travel through TEFL.
