Relevant Experience

While attending Junior and High School in Italy, I regularly attended, as a guest student in the Summer term, Newport Free Grammar School in Essex, UK. These experiences not only enabled me to develop greater fluency and accuracy with the English language but also gave me the opportunity to blend in the British culture. Moreover, I reckon that through these experience as a foreign student I can now better empathise with students that are challenging themselves to learn English as a foreign language and be a better teacher.

During my teenage years I was actively involved in running kids club within my community during the Summer.

I was involved in planning and supervising the daily activities of juniors. These activities included craftmanships, recreational games as well as sports. Through this I learned to manage small groups of children and young teenagers, deliver clear instructions in order to accomplish a task or perform an activity and engage all members.

MUN: Model of United nation. Together with other pupils from my school, we took part in a 3 day simulation of the UN Assembly General, in my case representing Costa Rica as a UN delegate. In the months building up to the event I had to thoroughly research out a given topic and build up a policy proposal. In order to do that I had to engage and coordinate with my peers in order to have a joint proposal. This taught me how to work in team and reinforced my negotiating competences, skills that I believe essential when it comes to interact with colleagues. Last but not least, this experience triggered an inner passion/interest for the global community, for knowing different cultures and actively engaging with them.

Employment
